Cosentus Invests in Accreda Healthcare Management — An Anesthesia-Exclusive RCM Provider

IRVINE, Calif.--(BUSINESS WIRE)--Cosentus Holdings, a premier provider in revenue cycle management (RCM) and integrated business solutions for healthcare practices, has announced a strategic investment in Accreda Healthcare Management — a purpose-built company specializing exclusively in anesthesia-focused revenue cycle management. This partnership marks a significant milestone in Cosentus’ commitment to deepening its specialization and elevating its service offerings in the anesthesia sector.

Accreda Healthcare Management stands apart from traditional billing companies. Founded by CPAs Logan Lowry and Mark Wines and rooted in a boutique style business model, and a partner-oriented philosophy — Accreda delivers customized, tailored support to anesthesia providers. Their focus on proactive communication, operational visibility, and hands-on guidance ensures that clients are not just treated as accounts — but as genuine partners, who are fully invested in each other’s success. Built for anesthesia and exclusively serving that specialty, Accreda delivers exceptional revenue performance — not just reports.

With over 25 years of experience, *Cosentus* is one of the most well-respected independent Revenue Cycle Management companies in the country. Certified by “Great Places to Work” and ranked by “Inc. 5000” as one of the fastest-growing private companies in the U.S. — for 4 consecutive years. Today, Cosentus is proud to partner with Accreda to deliver anesthesia-specific support that empowers providers to thrive like never before.

WHY THIS PARTNERSHIP MATTERS:

Anesthesia Specialization — With a sole focus on anesthesia, Accreda’s systems, coding expertise, and billing workflows are fine-tuned to address the specialty’s unique needs with precision.

Boutique, Custom-tailored Services — Clients enjoy proactive, personalized communication and deep operational insight — benefiting from true (one-on-one) partnership, rather than generic account management.

Enhanced Revenue Performance — Accreda transforms clinical precision into dramatic revenue impact, seamlessly managing every post-case process to strengthen practice profitability.

Anesthesia practices will now have access to the combined strengths of Cosentus and Accreda — delivering a unified platform that enhances coding accuracy, streamlines claims processing, and accelerates reimbursements — all with boutique-level attention and support.

COSENTUS

RELEASE SUMMARY

Cosentus invests in Accreda, an anesthesia-exclusive RCM provider, enhancing coding accuracy, claims processing & revenue performance.

Current Accreda clients can expect uninterrupted services and continuity as their trusted advisors will remain at their side — now empowered through Cosentus’ advanced technology and world-class support network.

“The Cosentus model of partnering with clients to achieve stronger financial results aligns seamlessly with the Accreda philosophy of clients first. Accreda was formed to ensure our anesthesia providers receive every dollar they have rightfully earned for the services they deliver. Together with Cosentus, our clients will benefit from cutting-edge technology, deeper analytics, and a partnership model that truly understands and drives their financial success.”

— Logan Lowry, Co-Founder and President of Accreda

“Cosentus has over 23 years in experience in servicing anesthesia providers. Accreda’s bespoke, anesthesia-focused operating model aligns seamlessly with Cosentus’ vision of delivering unmatched, practice-specific solutions. By joining forces, we’re equipping anesthesia providers with an upgraded suite of tech-enabled tools and expert resources — so they can prioritize exceptional patient care while maximizing their financial performance.” — GS Bhalla, Founder and CEO of Cosentus.
